

CMH SERIES

CORRECTIONAL SERVICES HOUSINGS

Corner mount high security enclosures.

The CMH Series of corner mount housings have been designed for Correctional centre applications. Featuring rugged construction, tamper resistance and with no centre projections the enclosures limit self harm issues.

CMH01 & CMH02 enclosures are compact body corner mount enclosures taking up less space than triangular housings that enclose similar sized cameras. The CMH02WM (wall mount) model has been designed for this range to meet the demand for similar enclosures that mount to walls up against the ceiling. The CMH02SS is a polished stainless steel version of the standard enclosure, often selected for use in elevators and applications where the finish suits the environment.

The CMH01 is sized for compact cameras eg: Watec and Elmo whereas the CMH02 is designed to suit standard and larger camera and lens combinations such as Panasonic, Sony and Ikegami.

OPTIONS

All housings are supplied with adjustable camera mounts. Tamper switches are available for all models as an optional extra.

APPLICATIONS

Correctional services housings designed for indoor and outdoor yards.
