## Heavy Duty Wall Mount Bracket

Mounting DIMENSIONS
INSTALLATION SUPPORT

This Bracket is designed to provide the installer with the flexibility of where the cable enters and exits.

It is suggested that the required amount of fixings should withstand up to 20kg of weight. Additionally the choice of fixing should depend on the type of bracket or fixing it is fixed to.

The bracket is designed for Strongabuilt and SEE designed housings. Other housings may fit, but should be discussed with See Security first.
