Lower pole 28.6mm
diameter. Part No.
3000mm- **LP30**
1500mm- **LP15**

Adjustable dropper pole, pendant mounted bracket

The APM1500 is design to adjust from 1550-2700mm in length and provides an easy installation with its light-weight material and versatile installation method.

The APM1500 is shorter in adjustable length the APM3000 and provides increased durability due to the rigid roof mount plate that is provided.

This bracket can suit any small—large domes and accommodating camera mounting kits range from 80mm in diameter to 160mm. There is also 3 available colours; ceiling white (cream), Manix white and Manix black.

OPTIONS

Various colours, and custom colours available. Individual poles can be purchased with the code FPM1500.

APPLICATIONS

Retail stores, grocery stores, warehouses and internal buildings where cameras are needed above tills.

INSTALLATION SUPPORT

This bracket is designed to provide the installer with the ability to install over multiple stages with ease.

It is suggested that the required amount of fixings should withstand up to 10kg of weight. Additionally the choice of fixing should depend on the type of ceiling or fixture it is being mounted on.

The bracket offers 2.7m of safe adjustable length, and can be installed in three stages (RMP, Outer Pole, Inner adjusting Pole)

Camera mounting kits for APM series are an extra item and are sold separately.

These Kits include: (measurement not limited to that size—giver or take 10-20mm per kit)
D2000-Kit (120mm cameras)
SNV-5084 Kit (160mm cameras)
SEEQAN Kit (90mm cameras)
AV8365 Kit (140mm cameras)
