

CMH03

CORRECTIONAL SERVICES HOUSINGS

Corner mount high security enclosure.

The CMH03 is designed for Correctional Centre applications. Featuring rugged construction, tamper resistance and with no center projections, the enclosure limits self harm issues.

CMH03 is a compact body corner mount enclosure, taking up less space than the triangular housings. The enclosure features increased lens angles that allow wide angle lenses to view directly below the housing. The CMH03 is suitable for 3 x 3m as well as larger rectangular holding cells.

This housing is designed to suit standard and larger camera and lens combinations such as Panasonic, Sony and Ikegami.
