# SNV5084-KIT

140-170MM CAMERA MOUNTING KIT

APM1500 & APM3000 series camera mounting kit

The SNV5084-KIT has been designed to accommodate various camera models to suit our APM & FPM dropper poles.

The Kit Includes the SNV5084 mounting plate with multiple holes for different cameras and two decorative covers to hide cables and provide an aesthetic look to the dropper pole mounting plates.

The SNV5084-KIT is the largest of the kits and maintains the easy installation method that has been used Australia wide

INSTALLATION SUPPORT

This Kit is designed to provide the installer with the flexibility of which camera can be used

It is suggested that the required amount of fixings should withstand up to 6kg of weight. Additionally the choice of fixing should depend on the type of bracket or fixing it is fixed to.

The bracket is designed for Strongabuilt and SEE designed dropper poles. Other configurations may fit, but should be discussed with See Security first.
